

MEMBERS' CHALLENGE 2019

The Trillium Members' Challenge for the spring of 2019 is
"Creating Water Art."

In *Creating Water Art*, ideas could include photographing any form of water, such as clouds, ice, steam, drops, splashes, lakes, oceans, rivers, streams etc. The approach could be anything from wide angle to close-ups. There are also in-camera effects to consider, such as long exposures, multiple exposures, camera movement and so on.

You could even look up the definitions of water at <http://www.dictionary.com/browse/water> for more ideas... such as idioms using the word water.

This is an exciting topic as there are so many ways to approach it – ***so think creatively and submit 5 to 8 images involving water!!!***

All images are to be sized as per clinics and named with owner's name and a number, eg. John 001.jpeg. Please provide a title page with your name and challenge information, like moving water, dirty water etc.

Entries are to be e-mailed by April 16 – to John Overmeyer at:
trillium.night@gmail.com

This is not a competition, so have fun participating in
The Challenge.
